Comments: UAA survey occurred in March 2005 and no uses were observed. An interview revealed that "neighbors fish, no one swims." However, there is a rope swing under the bridge at site #087. The stream met the maximum depth criterion at three out of six sites; the average depth criterion at four out of six sites. There is not enough evidence to rebut a whole body contact designation. Extensive interviews and/or historical information were not provided.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use
